## RRP RX4E Dunbar Edition 4WD 1/10 Team Buggy Kit #RRP-01RX4E

ELECTRIC ▪ OFF ROAD ▪ 1:10 SCALE ▪ 4 WHEEL DRIVE ▪ KIT

Unmatched Performance. All in One Kit.

Never before has a single kit delivered such a comprehensive array of premium features and specialty aftermarket parts—right out of the box. The Team Rubrix RX4E is engineered for serious racers who demand race-proven performance, lightweight construction, and maximum durability.

# BRIAN DUNBAR: WORLD CLASS - LEGENDARY TALENT

As many of you know, the Rubrix Racing Products 4WD Revival Class at the JConcepts Vintage Clash of Champions proved to be one of the most intense on the track battles of the weekend. A class that Brian was scheduled to compete in with this exact car kit, and the car kit that was last on his workbench at the time of his passing. His closest friends and competitors all rallied together to put on a show in this class to pay their respects. Ultimately, Team DBR won the event, taking TQ as well with his Rubrix Racing RMP kit driven by Chris VanAir. However, Jose Zayas pulled in second place finish, with Scott Spear getting on the podium with his Rubrix Racing RX4E kit. Allen Horne entered the class with a Production Kit Yokomo MX4 that had many Rubrix Racing parts added to it for added durability. Allen Horne, one of his closest friends and competitors, won the Legends Invite class in dominant form at this event, and donated the Dunbar Cup to the Henley family and owners of Hoosier RC HobbyPlex to continue on his legacy.

This limited-edition kit includes high-strength components developed with advanced manufacturing techniques and years of vintage RC racing expertise. It also features exclusive setup and tuning insights from racing legend Brian Dunbar, giving you a competitive edge straight from the track.

With cutting-edge design, precision handling, adaptable suspension geometry, and unparalleled ease of maintenance, the RX4E sets a new benchmark for elite RC performance. Team Rubrix once again redefines what's possible in a race-ready platform.

Brian Dunbar's legacy will live on forever, and this tribute edition kit is an extension of that. One of the primary goals of Brian's iconic racing career that was never fulfilled was getting the box art of a car kit. Something he wanted and worked so hard to achieve. At the JConcepts Vintage Clash of Champions, Rubrix Racing Products announced to Brian's father and family that this Brian Dunbar edition kit would be released to the public to fulfill his lifelong dream. This kit is a tribute to Brian's amazing personality, racing career and impact on the RC community. As Brian would always say, "I appreciate you"

## FROM TEAM RUBRIX – CREDITS, ACKNOWLEDGEMENTS, & MENTIONS

Rubrix Racing Products is proud to officially announce the highest of achievements to date. We have worked on something that Brian wanted his entire RC career and now is a reality.

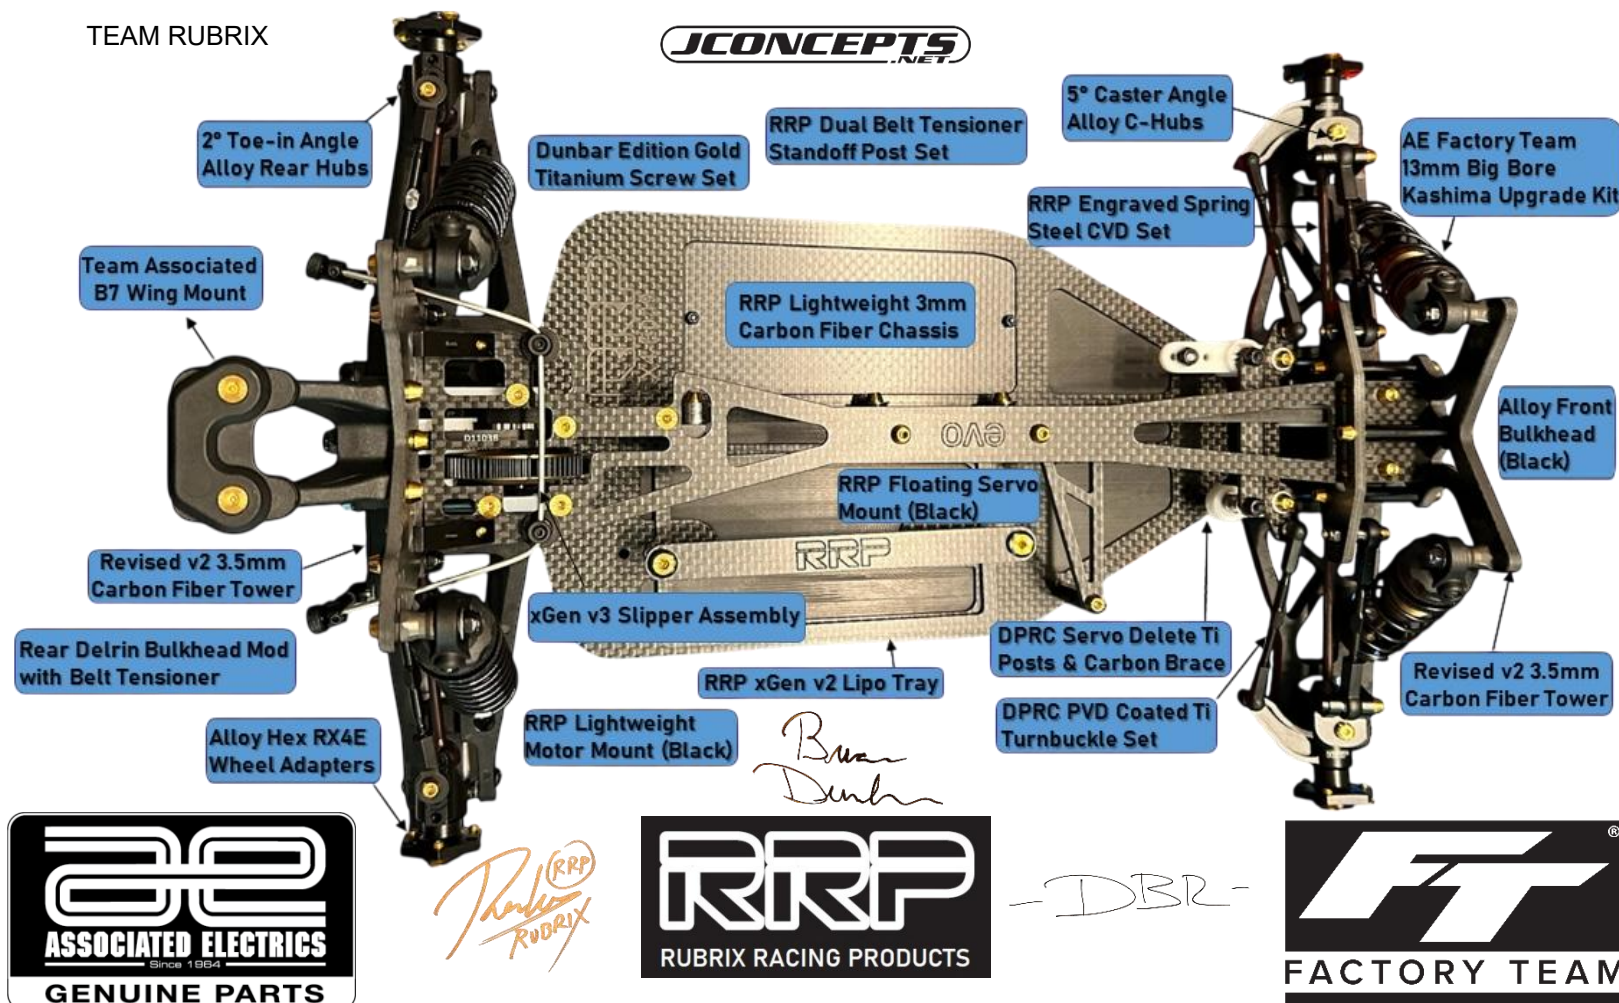

The level of collaboration with our partners has been instrumental to be able to piece this together. A big thank you goes out to both **Richard Saxton** and **Michael Wortel** from the amazing **Team Associated** squad. Thanks to them, we have agreed to include what we consider to be the best line of shocks available in the market for competitive RC racing >> 13mm Big bore shocks with **Factory Team** Kashima coated bodies amongst many other AE Genuine components. Big thanks to **Jason Ruona** from **JConcepts Inc.** for allowing to include their stellar Smoothie tires as a tire selection of choice that Brian Dunbar would have used at the Clash of Champions event back in March. Huge thanks to **Mr. Dave Dunbar** and the **Dunbar family** whom have been so generous throughout the process of this kit creation. A portion of each kit sale will be going back to the Dunbar family as well.

Another thank you goes out to our friends at **DragonPunch RC** for helping us put logo thoughts and ideas into Digital form. The Rubrix RX4E "Dunbar Edition" logo in this box kit was a concept and idea from Brian Kinwald's iconic Losi XXCR box art design / One of which Brian Dunbar loved and imaged could one day ever be brought to life for him, and this final design was something that Dan McDade from DPRC nailed for us.

Legends are forever, and we can't wait to see the storyline this car will make for generations to come. Best for last, thank you to **Drew Boyd** for being *the master mind behind the scenes* working with us and assisting throughout the logistics of it all. You are a master mind.

In the words of Dave Dunbar: "Thank you for keeping the legacy of my son alive!" We miss you Brian Dunbar. Enjoy your box art kit!

TEAM RUBRIX
